### Configured Your Way

That is the reason that Nevers introduced the Simple Collection. To allow you to easily specify the required product configurations and to easily specify multi-functional meeting and conferencing rooms with flexible products.

The key to Simple is interchangeable components in multiple sizes and finishes which perfectly suit any small enclave, team room, project room, full scale meeting or conference room.

It's also beautiful. Simple furniture is striking to look at in every finish and configuration. We build it to your specifications in the size, configuration, finish color, and base you select for the customers' space. Its design is cleanly contemporary and enduringly classic. Casegood tops and door fronts are offered in frosted glass, silver colorcoat and wood finishes. Table legs are produced in aluminum and wood and effectively house power cabling for the discreet containment of electrical and data cords. You can choose one piece or build entire rooms to your exact specifications knowing that the design is clean, current and capable.

### Conference Tables

The Simple Conference Tables are stylized in a cleanly contemporary design that compliments any design format. The support structure allows all cabling for power and AV to be installed prior to the table top being attached. This eliminates damage to the top during installation and significantly reduces the complexity of cable routing and installation time.

### Casegoods

Casegoods represent the ultimate form of multiplicity from simplicity. The collection consists of multiple versions of single wide and double wide cabinets that can be specified in an unlimited number of configurations with varying door materials and cabinet top options. The cabinets are designed to be specified and used in two ways. The first is as modular furniture. The cabinets may be specified as stand-alone modules that are simply butted together at installation to form the required piece—credenza, mediawall, storage tower. Modular cabinets enhance the contemporary styling of the space and allow the end user maximum flexibility for future growth, such as reconfiguring the room or using the cabinets in other rooms.

Secondly, the Simple cabinets may be specified with a common connecting top. This maintains the ease of configuring the cabinets to the customers' requirements, while presenting a more traditional single piece furniture appearance. For ease of specifying, the Simple cabinets are also offered as preconfigured cabinets in the most commonly requested configurations. It's simple, and it's specification-friendly. If you are in a hurry, let us plan the room for you with individual pieces specified and floor-planned in multi-application formats. That's simple, too.

The Simple Casegoods are offered in two depths. The 16" depth is the preferred cabinet for smaller rooms. The 22" depth is scaled for larger rooms and rooms requiring AV components and power accommodations. The double wide 22" deep e-cabinets are vented and ready to accept a rack mount for AV components. For simplicity in ordering and security for the end user, cabinets are standard with locks. Locks are not available on glass door cabinets.

As an added bonus, you will find the furniture in the Simple Collection to be competitively priced. The Simple Collection maintains our reputation for "high quality product designs, crafted only with the highest qualities of material and workmanship and delivered trouble-free as promised". It is through design engineering that we are able to offer the Simple Collection at surprisingly competitive pricing.

**AWI “A” Grade Wood Veneers**

Simple products are crafted in “A” grade wood veneers available in Mahogany, Black Walnut, White Oak, Cherry and Maple. Veneer panels are 3-ply balanced construction, are laid up with plain sliced face veneers and are balanced on back to minimize warping and to balance natural stresses. Cores are either 45# particleboard, or 55# medium density fiberboard, per ANSI standards 208.1 or 208.2. Face veneers meet or exceed AWI custom standards and are “A” grade. All “A” face veneers are center matched and either book or slip matched and are laid up to Nevers’ custom specifications.

**Wood Veneer Finishes**

Standard wood veneers finishing process is a multi-step procedure involving dyes, stains, toners, sealers, lacquer. For added protection and durability, the final topcoat on all horizontal surfaces is a catalyzed-blended, lacquer/varnish finish. All finishing processes have been formulated to provide maximum durability and clarity, and to enhance the natural characteristics of each particular wood species. Standard finish is open pore. Semi-filled and filled finishes require an up charge and may extend the lead-time. Please contact Customer Service for pricing and availability on these and other wood species.

Note: Color variation will occur in the grain of all wood species. This is an inherent characteristic caused by the annual growth rings found in all hardwoods and by the manner in which the boards and veneers are cut across these growth rings. In some species, this color variation is very subtle. In other species this color variation is obvious and at times radical.

The process of finishing hardwood veneers determines whether these variations are enhanced or subdued. Natural finishes will show color variations in the grain and enhance the beauty of the wood to its fullest extent. Other stains, toners, and finishes tend to blend these variations, dependent upon the depth of color and the particular method of application.

## UNDERSTANDING NEVERS MEETING LINK™

The Nevers Meeting Link System is comprised of Technology Centers and Power Centers

### Technology Centers

Technology Centers conform to UL 183, 20 AMP plug is the standard for manufactured electrical systems. Nevers proprietary Technology Centers use modular power connections, are daisy chainable and are ideal for all installations where multiple electrical outlets connect to a single power in-feed. They are available in single or multiple circuits. Technology Centers can be hardwired or connected with a molded plug. Data and AV are easily integrated in Technology Centers.

**INSTALLATION:** Technology Centers are installed in the table base system *before* the top is placed. This provides electrical, data and audio visual contractors a convenient, well lit work area. The table top is placed on the base system *after* technology integration is complete. This helps prevent table top damage attributable to third party contractors.

### Power Centers

Power Centers conform to UL962A, the standard for furniture power distribution units. Power centers connect directly to a power outlet with a molded plug. Power Centers are a flexible, cost effective solution for mobile or light duty applications. Power Centers do not connect in series. Data and basic AV connections are easily integrated in Power Centers.

**INSTALLATION:** Power Centers drop through the table top. They are the last part of the table to be installed. This is a quick and simple installation process for light duty power/voice/data applications.

### Pre-Configured Meeting Link™

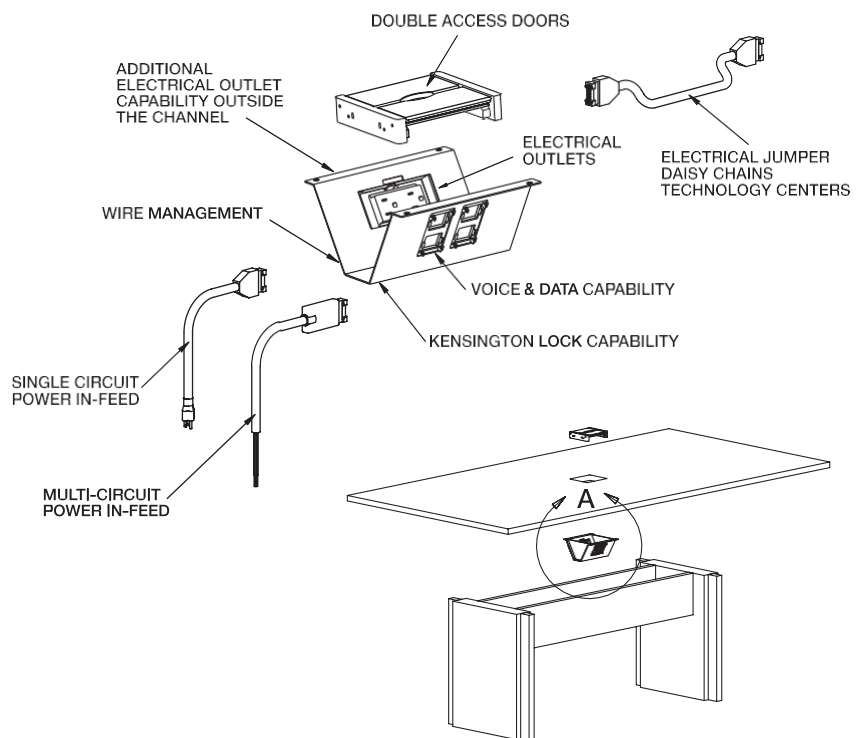

Nevers offers pre-configured Meeting Link solutions for all tables. This is an easy, trouble free method to specify power, voice and data connections. Whether you have light, medium or heavy applications, there is a convenient pre-configured solution.

### Custom Meeting Link™

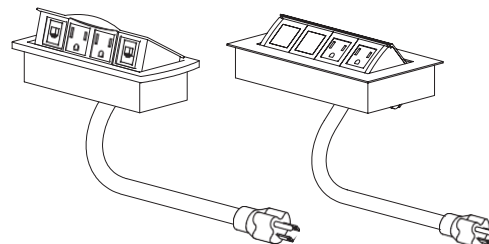

Meeting Link can be custom configured to meet any specific requirement. All Meeting Link products are available "a la cart" so you can develop a system that meets your clients exact needs.
